Database & Query Languages: SQL, PL/SQL

Methodologies: Scrum, Agile Development

Language: Portuguese (native), English (Advanced – B2), Spanish (Basic – A2)

Projects

Portfolio Website (Front-End)

[GitHub Repository](#) 

Personal Project

Feb 2026

- All interface design and user experience planning were completed beforehand in Figma.
- Key highlights include a fully responsive layout that adapts seamlessly across all devices, animated scrolling text components for dynamic visual interest, and a horizontal image gallery with smooth scrolling interactions.
- Tools: Next.js, React, TypeScript, Tailwind CSS

Rail Freight Logistics Management System

[GitHub Repository](#) 

3rd Semester University Integrative Project

Sep 2025 – Jan 2026

- Co-developing a multi-component railway logistics system with station, freight, and routing management.
- Implementing warehouse handling, route scheduling, and performance-focused data structures.
- Tools: Java, PL/SQL, C/Assembly, Git, GitHub, Visual Paradigm, Scrum

Clinical Psychologist Website (Front-End)

[GitHub Repository](#) 

Patrícia Bacelar Psicologia Clínica

May 2025 – Present

- Developed a professional website for a clinical psychologist, translating requirements into a clear digital presence.
- Delivered a responsive, accessible multi-page application with intuitive navigation.
- Created a scalable front-end aligned with the client's branding.
- Technologies: Next.js, React, TypeScript, Tailwind CSS

Railway Network Simulator

[GitHub Repository](#) 

2nd Semester University Integrative Project

Feb 2025 – Jun 2025

- Co-developed an interactive railway simulator enabling users to create stations and lines, and manage network operations.
- Implemented strategic, economic, and logistical features within a dynamic simulation environment.
- Tools: Java, JavaFX, JUnit, GraphStream, Python, Git, GitHub, Scrum, IntelliJ IDEA

Image Reconstruction and Identification Using Eigenfaces

[GitHub Repository](#) 

1st Semester University Integrative Project

Dec 2024 – Jan 2025

- Co-developed a Java console application for facial image reconstruction and recognition using the Eigenfaces algorithm.
- Implemented key features such as image compression, synthetic face generation, and Euclidean-distance-based recognition.
- Final grade: 20/20
- Tools: Java, Python, la4j, JUnit, CSV/JPG, Git, GitHub, Scrum, CLI, IntelliJ IDEA

Experience

Co-coordinator of the Design Department

Jan 2026 – Present

Núcleo de Estudantes de Informática do ISEP

Porto, Portugal

- Co-coordinate the Design Department, leading a 14-member team in producing visual assets and responsive event websites in Figma while ensuring consistent branding across social media, web platforms, and internal communications, enhancing participant engagement.

Ambassador – CGI Ambassadors Program

Aug 2025 – Present

CGI Group

Porto, Portugal

Member of the Design Department

Jul 2025 – Jan 2026

Núcleo de Estudantes de Informática do ISEP

Porto, Portugal

- Designed visual materials and responsive event websites in Figma, boosting participant engagement.
- Maintained consistent branding across social media, websites, and internal documents with a 14-member team.

Member of the Informatics Department

Oct 2024 – Jul 2025

Núcleo de Estudantes de Informática do ISEP

Porto, Portugal

- Developed and maintained the official student association website using React and Tailwind CSS, delivering a responsive, accessible interface.
- Provided on-site technical support for "FallStack 2024" attended by 200+ participants.
